

COMPANY OVERVIEW

Workhenge Inc. is a nationwide supplier and installer of commercial-grade modular workspace systems, including office sound pods, prefabricated conference rooms, and privacy solutions. The company provides turnkey office furniture procurement, logistics coordination, and professional installation, converting new or occupied space into functional work environments in as little as one day. Working through an inventory-based fulfillment model and a national installation network, Workhenge delivers, assembles, relocates, and commissions workspace across the continental United States with minimal disruption to building operations.

CORE COMPETENCIES

- **Modular office sound pods** for private calls, focus work, wellness rooms, interview, and collaboration spaces, engineered for installation inside occupied facilities.
- **Prefabricated modular conference rooms and private workspaces** installed in as little as one day, removing the schedule, demolition, and permitting burden of traditional construction.
- **Turnkey furniture procurement and project management**, including product selection, specification support, logistics coordination, and installation oversight.
- **Nationwide delivery, assembly, relocation, and commissioning** through a national logistics and professional installation network.
- **Inventory-based rapid fulfillment** enabling expansion or reconfiguration of workspace with order-to-occupancy in as little as ten days.
- **Multi-site and post-installation support** for phased and campus-wide workplace rollouts across multiple locations.

DIFFERENTIATORS

- **Single-source turnkey accountability.** One team owns product selection, logistics, installation, and commissioning, removing the handoffs and coordination gaps of multi-vendor office fit-outs.
- **Stocked, ready-to-ship inventory** rather than made-to-order production, which is the model that removes the multi-month lead times typical of custom sound pods and modular rooms.
- **Reconfigurable, redeployable assets.** Modular pods and rooms can be relocated or reconfigured as missions change, avoiding the demolition and sunk cost of permanent drywall build-outs.
- **Certified-grade product quality.** Supplied pods and furniture systems meet recognized product standards, including ISO 9001, Underwriters Laboratories / Intertek (UL / ETL) listing, Greenguard Gold, and ANSI/BIFMA, through vetted manufacturing partners.

RELEVANT COMMERCIAL EXPERIENCE

Office-within-Warehouse Workspace Build-Out \$200,000
Client: Defense-Industry Startup · **Date:** Pending
Designed and installed three large modular conference rooms and five office privacy pods in three days, converting an acquired warehouse into a functional collaborative workspace alongside active manufacturing equipment. The client expanded the deployment with additional rooms and pods within three months.

Manhattan High-Rise Privacy Pod Deployment \$125,000
Client: Major Media Enterprise · **Date:** Pending
Procured, delivered, and installed 25 modular office sound pods across multiple floors of a downtown Manhattan high-rise under restricted loading access and scheduled delivery windows. All units were installed within five days, reducing the overall project timeline by more than 75% and enabling rapid occupancy.

REPRESENTATIVE CLIENTS: Amazon, Gap, Vertiv, Vatic, Together.ai, Picarro, SHEIN, DoubleVerify, Fiddler, Intapp, Lufthansa Technik, BuildBlock, and Sirius XM.
